OBJECTIVE

Full Stack Developer seeking new opportunities to apply expertise in building high-performance web applications that streamline processes and boost productivity. Proven ability to translate complex business needs into intuitive and elegant interfaces. Passionate about exploring emerging technologies and frameworks to enhance development efficiency. A collaborative team player with a proactive problem-solving approach and a solid understanding of backend technologies and databases, eager to contribute to innovative projects.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, C, C++
- **Web Technologies:** React JS, Next JS, FastAPI, Redux, Node JS, Express JS
- **CSS Libraries:** Tailwind CSS, ShadCN UI, Material UI, Styled Components
- **DataBases:** MongoDB, PostgreSQL
- **Other Tools & Technologies:** MCP-Server, Figma, Git, JIRA

EXPERIENCE

- **Reelkart** Nov 2023 - March 2024
Frontend Developer Gurgaon, India (Remote)
 - Developed responsive admin dashboard to view stats and analytics in tabular form
 - Worked on graphs to show metrics in different types of graphs using react-charts
 - Worked on responsive landing page with animations using framer motion
 - Implemented light and dark theme functionality on landing page

EDUCATION

- **Gautam Buddha University** Sept 2022 - April 2026
Bachelor of Technology Greater Noida, India
 - GPA: 7.54

PROJECTS

- **AuraFix : An image enhancer AI tool** [Github Link : [GH](#)]
[Live Link : <https://aura-fix.vercel.app/>]
 - Built with React, Vite and Tailwind CSS for fast performance, modular structure, and a clean UI.
 - Integrated an AI enhancement API, handling async requests with proper loading and error states.
 - Added animated UI (BackgroundBeams) while managing interaction issues using z-index and pointer-events.
 - Enabled image download post-enhancement with intuitive before-after viewing for better UX.
- **ThinkTweet: Your Personal Tweet-Generating Bot** [Github Link : [GH](#)]
 - ThinkTweet is an AI-powered Twitter bot that generates and posts tweets based on user prompts, including smart hashtags and relevant content.
 - Built on MCP (Model Context Protocol) servers for efficient communication between AI and backend logic.
 - Gemini API on the frontend to craft creative and context-aware tweet content.
 - Backend powered by Node.js and Express, integrating with the Twitter API using secure developer credentials.
- **Pizzeria: Pizza ordering webapp** [Github Link : [GH](#)]
[Live Link : <https://pizzeria-sandy.vercel.app/>]
 - Developed Pizza ordering webapp using React JS, Tailwind CSS, React Router Dom, Formik, Yup
 - Implemented filters to sort by ingredients and price
 - Implemented add to cart and checkout
 - Integrated formik and yup for form validation and management to record user information

HACKATHON EXPERIENCE

- **GDSC Web Competition** April 2024
GDSC : Gautam Buddha University
 - Secured 2nd prize at the GDSC GBU hackathon.
