OBJECTIVE

Full Stack Developer seeking opportunities to apply expertise in building high-performance web applications. Proven ability to translate business needs into intuitive interfaces. Passionate about emerging technologies, efficient development, and collaborative problem-solving.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, C++
- **Web Technologies:** React JS, Next JS, FastAPI, Redux, Node JS
- **CSS Libraries:** Tailwind CSS, ShadCN UI, Material UI, Styled Components
- **Databases:** MongoDB, PostgreSQL
- **Other Tools:** MCP-Server, GSAP, Figma, Git

EXPERIENCE

• Reelkart

Frontend Developer

- Built responsive admin dashboard with tabular analytics
- Developed graphs using react-charts for metrics visualization
- Designed responsive animated landing page using Framer Motion
- Implemented light/dark theme toggle

Nov 2023 - Mar 2024

Gurgaon, India (Remote)

EDUCATION

• Gautam Buddha University

Bachelor of Technology

- GPA: 8.26

Sept 2022 - Jun 2026

Greater Noida, India

PROJECTS

• Findly : Image & Web Search powered by MCP

[Github Link : [🔗](#)]

[Live Link : <https://findly-10.onrender.com/>]

- Full-stack Web App built with React.js, TailwindCSS (frontend), FastAPI (backend), and PostgreSQL (database).
- AI-powered search & image workflow handling, integrated with **MCP** server using **DuckDuckGo MCP** for web search and **Flux-Image-Gen MCP** for image generation, enabling smarter context-driven operations.
- **User authentication & authorization** for secure access and personalized workflows.
- Analytics **dashboard** to visualize workflow actions, usage patterns, and performance.
- End-to-end integration of **CRUD** enabling seamless collaboration, **responsive UI**, and smooth data flow across the stack.

• Doctro : Seamless healthcare scheduling.

[Github Link : [🔗](#)]

[Live Link : <https://doctro.vercel.app/>]

- A **medical scheduling platform** for patients to filter/book slots and doctors to manage availability.
- Built with **React 19**, **Vite**, **React Router**, and **Tailwind CSS v4** featuring glassmorphism design.
- High-performance **RESTful API** driven by **Python**, **FastAPI**, **Uvicorn**, and **Pydantic** for validation.
- **PostgreSQL database** via SQLAlchemy, utilizing JWT (python-jose) and Argon2 role-based auth.
- Showcases full-stack design, **Razorpay** for payments, email services, and Render cloud deployment.

• Chronos : Crafting Time Through Immersive 3D Web Experiences

[Github Link : [🔗](#)]

[Live Link : <https://chronos-roan-two.vercel.app/>]

- A highly interactive, premium frontend application for a luxury watch brand "**Chronos**" designed to showcase craftsmanship through a sophisticated dark-mode aesthetic and smooth UX flows.
- Features a unique, abstract 3D mechanical clock face rendering in the background that **dynamically rotates and tilts** in response to the user's scroll position.
- Implemented complex, **scroll-linked parallax animations**, staggered text reveals, dynamic hover states on product cards, and sequentially glowing interactive elements.
- Powered by React for a high-performance frontend, integrated with **Three.js** to handle the 3D rendering, and **GSAP/ScrollTrigger** for all scroll-based motion.

HACKATHON EXPERIENCE

• GDSC Web Competition

Apr 2024

GDSC : Gautam Buddha University

- Secured 2nd prize at GDSC GBU hackathon

CERTIFICATES

• Introduction to Model Context Protocol by Anthropic

Issued: April 2026

[View Certificate]

- Successfully completed certification demonstrating relevant technical skills and learning.
